Mission and Vision

My mission is to develop, design, and maintain interactive online media for my clients. I take the time to listen to their needs and goals, and to understand their aesthetics in order to create web sites or marketing materials that fully represent their company and brand.

Experience

Freelance 2012-Present

I've worked as a freelancer for several years while also working full-time and attending graduate school. My freelance projects have varied greatly depending on the clients needs.

WordPress - Working with CSS, HTML, and PHP to create custom themes, or to uniquely re-design existing themes to fit clients needs.

Site Maintenance - Perform maintenance work on websites, such as fixing broken links, updating themes, making features responsive, moving domain hosting.

Video Editing - Primarily utilizing Adobe Premiere to make short videos as needed, and embedding them onto websites.

Social Media - Assisting with the set-up of social media accounts, and training in best practices for gaining followers.

Marketing - Create marketing materials such as postcards, magnets, and newspaper ads.

Education

Quinnipiac University

Master of Science Degree in Interactive Media

Online

Dec. 2014

Johnson & Wales University
